NetMeeting

Setting the program Microsoft NetMeeting.

Installation of the program.

You can load the latest version of the installer Microsoft NetMeeting from :

<http://www.microsoft.com/windows/netmeeting>

After that it is necessary to start up the installer and to install NetMeeting. After that reboot the computer.

If Net Meeting is already installed.

If NetMeeting was already installed on your computer, you need to check its version.

For that you need to start-up NetMeeting and select in Help menu -> About program NetMeeting (Help -> About program NetMeeting). After that you should pay attention to version number. If it is 3.0 or lower, you unambiguously need to update NetMeeting by the way of loading of its latest version and installation. Normal functioning of telephone service with the version 3.0 is impossible because NetMeeting 3.0 contains mistakes. There are no problems with the version 3.1. We recommend to use NetMeeting 3.1 (buid 4.4.3396)

NetMeeting update

Update of NetMeeting version is completely similar to its usual installation. Don't forget to close NetMeeting before beginning update for that program-installer could update its normally.

NetMeeting adjustment

For adjustment of NetMeeting the data, which you have obtained at registration, are used. Therefore you need first to register through home page of our site and replenish the balance.

Than do step-by-step:

- Start up NetMeeting
- Select in menu Tools -> Options
- Select tab General
- Fill fields Name/Surname (First Name/Last Name)
- Fill the field e-mail
- Select ☒ "Do not list my name in directory"
- Deselect ☐ Log on to a directory server when Windows starts
- Press the button "Bandwidth Settings"
- Select ☐ 28800 or faster modem
- Press OK
- Press the button "Advanced Calling"
- Select ☒ "Use gatekeeper to place calls"
- Type IP address 82.146.51.32 in the field "Gatekeeper"
- Deselect ☐ "Log on using my account name"
- Select ☒ "Log on using my phone number"

- In the field Phone number type your ID number, issued at registration
- Press OK
- Select in the top tab "Audio"
- Select ☒ "Enable full-duplex audio so I can speak when receiving audio"
- Deselect ☐ "Enable auto-gain control"
- Deselect ☐ "Automatically adjust microphone volume while in call"
- Select ☒ "Enable DirectSound for improved audio performance"
- Select (o) "Let me adjust silence detection myself"
- Move regulator to extreme right position
- Press the button "Advanced"
- Select ☒ "Manually configure compression settings"
- In the field "Preferred codec for audio compression settings" select Microsoft G.723.1,8kHzMono,6400Bit/s
- Press OK
- Select tab "Video" in the top
- Deselect ☐ "Automatically send video at start of each call"
- Deselect ☐ "Automatically receive video at start of each call"
- Press OK

Call through NetMeeting

If NetMeeting is normally adjusted then at starting it displays no mistakes about registration on server and main program menu appears. In the line at the left of the button with telephone you enter telephone number in international format, including own prefix in front of it. After that you press Enter or button with the telephone. At that dialing and conversation with remote telephone user take place. After conversation ending you terminate it pressing the button with telephone icon with down arrow.

Read this First

NetMeeting lets you hold video conference calls, send text messages, collaborate on shared documents, and draw on an electronic whiteboard over the Internet or an intranet. This version of NetMeeting contains Service Pack 2. It includes the latest version of NetMeeting 3.01, software development kit (SDK) bug fixes, and all of the fixes previously included in Service Pack 1.

How to download

1. Click the **Download Now** button above.
2. In the **File Download** dialog box, select **Run this program from its current location**.
3. Click **OK** to continue.

How to use

You don't need to do anything after downloading.

How to uninstall

1. Click the **Start** button, point to **Settings**, and then click **Control Panel**.
2. Double-click **Add/Remove Programs**.
3. Select **NetMeeting 3.01**.
4. Click **Add/Remove**.
